About This Content

This collection includes everything you need to build a full game in a single style: characters, battlers, faces, tilesets, monsters, icons, and even system graphics.

OMEGA MODERN includes over one hundred character sprites, and that isn't even counting the animals, aliens or robots. Each human character also has a face graphic, and sixteen of them have fully animated side-view battlers so they can be used as heroes. Each monster has an overworld walking sprite as well as a image to be used in side-view combat. On top of that, extra character sets are included for cars, vehicles, treasure chests, switches, and special effects.

Twenty-six tilesets-- including autotiled water, terrain and buildings-- provide a variety of options for creative locations. Forests, caves, towns and cities are a given-- there's also tiles for a school, a science lab, a fast-food restaurant, bathrooms, and more. House and building tiles can be mix-and-matched for even more options in creating your game world. Also included: a huge set of icons for items, weapons, equipment, etc.

OMEGA MODERN also has the system graphics needed to keep your game looking good with a single consistent style: emotion balloons, animated state icons, and even four different window skins. All of it is designed to work together!

Features:

- * Over 100 overworld character sprites
- * 26 tilesets! Interiors and exteriors-- towns, cities, forests, dungeons!
- * 50 monsters-- with overworld sprites and battle graphics

-
- * Side-view battlers and face graphics for hero characters
 - * Icon set with 170+ icons for items, food, equipment, etc
 - * System graphics to match the pixel style: balloon, states, weapons, and window skins!

Title: RPG Maker MV - Omega Modern Graphics Pack

Genre: Design & Illustration, Web Publishing

Developer:

finalbossblues

Publisher:

Degica

Franchise:

Maker

Release Date: 24 Jan, 2019

b4d347fde0

English,Japanese

This pack is one of the best that I have ever bought from finalbossblues. It's like the Old School Modern packs, but what makes this equally amazing is that this also comes with something for VX Ace too. He oughta make some battle backgrounds for his Time Fantasy, Old School Modern and Omega Modern graphics packs as well. Either way, I hope he keeps up the good work.
